

SCIENCE

Speed, velocity and acceleration

It is not necessary to carry out all the activities contained in this unit. Please see *Teachers' Notes* for explanations, additional activities, and tips and suggestions.

Theme	Speed, velocity and acceleration	
All students: Activities that are suitable for Learning Support, Language Support and the Mainstream Subject Class include:	Keywords	3
	Vocabulary File	4-6
	Activating Students' Existing Knowledge	7
	Completing Sentences	13
	Multiple Choice	14
	Writing	15-16
	Wordsearch	20
Learning support and Language support: Activities suitable for students receiving Learning or Language Support include:	Working with words	8
	Picture Sentences	9
	Odd One Out	10
	Science Keywords	11
	Unscramble the letters	12
	Alphaboxes	19
	Play Snap	21-23
Language support: Additional activities for Language Support:	Grammar points	17-18
Levels for Language Support	A1 – B1 The language level of each activity is indicated in an information box.	
Learning focus	Using Science textbooks and accessing curriculum content and learning activities.	
Acknowledgement	The <i>English Language Support Programme</i> acknowledges the permission of Gill and Macmillan to reproduce excerpts from <i>Extracts from Science Revision for Junior Cert.</i> by Shea Mullally	

Note: The categorisation of activities is indicative only and should not prevent teachers from using any activities that are considered suitable for a particular group of students.

Making the best use of these units

Learning Record

A copy of the Learning Record should be distributed to each learning support and language support student.

Students should:

1. Write the subject and topic on the record.
2. Tick off/date the different statements as they complete activities.
3. Keep the record in their files along with the work produced for this unit.
4. Use this material to support mainstream subject learning.

Introduction of a topic or activity should ensure that students understand **what** they are doing and **why**. Many students will have some difficulty in understanding both the language in the activity and the instructions/purpose for carrying out the activity.

You can create your **personal teaching resource** by printing these units in full and filing them by subject in a large ring binder.

Encourage students to:

- Bring the relevant **subject textbooks** to learning/language support class. It does not matter if they have different textbooks as the activities in these units refer to vocabulary and other items that will be found in all subject textbooks. These units are based on curriculum materials.
- Take some **responsibility for their own learning** programmes by:

Developing a **personal dictionary** for different subjects, topics, and other categories of language, on an on-going basis. This prompt is a reminder.

Recording what they have learnt on the **Learning Record**, which should be distributed at the start of each unit.

Keeping their own **files** with good examples of the work produced for different subjects and topics. This file will be an invaluable **learning resource** in supporting mainstream learning.

Indicates that answers may be found at the end of the unit.

Don't forget that many of the activities in these units are also suitable as **homework** tasks or for **self-study**.

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Keywords

The list of keywords for this unit is as follows:

Nouns

acceleration
athlete
average
deceleration
direction
distance
graph
metres (shortened to *m*)
minutes
object
rate
rate of change
second
speed
table
time
velocity

Verbs

to accelerate
to change
to divide
to finish
to increase

to measure
to slow down
to speed up
to start
to travel

Adjectives

constant
fast
fastest
remaining
similar
slow
slowest
speeding
stable
stationary
travelling

Other key words

in a given time
per second
the same
the time taken

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Vocabulary file 1

Word	Meaning	Note or example*
velocity		
speed		
acceleration		
deceleration		
time		
minute		
second		

* You may wish to write a sentence or phrase, make a note of the page in your textbook where this word appears or, if English is not your first language, provide a translation into your language.

Get your teacher to check this, then file it in your folder so you can use it in the future.

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Vocabulary file 2

Word	Meaning	Note or example
graph		
metres		
distance		
accelerate		
change		
increase		
fastest		

Get your teacher to check this, then file it in your folder so you can use it in the future.

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Vocabulary file 3

Word	Meaning	Note or example
to increase		
to speed up		
stationary		
stable		
per second		
the same		
the time taken		

Get your teacher to check this, then file it in your folder so you can use it in the future.

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Language Level: All
Type of activity: Whole class
Suggested time: 10 minutes

Activating students' existing knowledge

Use a spidergram to activate students' ideas and knowledge on the key points in this chapter. See **Teachers' Notes** for suggestions.

Possible key term for the spidergram:

speed time movement

- Invite newcomer students to provide key words in their own languages.
- Encourage dictionary use.
- Encourage all students to organise their vocabulary into relevant categories (e.g. meaning, nouns, keywords, verbs etc.).

All students should record vocabulary and terms from the spidergram in their personal dictionaries.

NAME: _____ DATE: _____

SCIENCE: Speed, velocity and acceleration

Language Level: A1
Type of activity: Pairs or individual
Suggested time: 30 minutes

Working with words - Tick the correct answer

1)

- a) train
- b) car
- c) plane
- d) bike

2)

- a) tripod
- b) athlete
- c) animal
- d) soldier

Circle the words in the box that are about travelling or can be used to travel

shirt	plane	telephone
rocket		
fast	bus	slow
hair	train	dinner
dog	car	
bicycle	book	boat
helicopter		

Language Level: A1
 Type of activity: Pairs or individual
 Suggested time: 30 minutes

Picture Sentences - Tick the correct answer

1.

- a) This is a train.
- b) This is an experiment.
- c) This is a car.

2.

- a) This is a train.
- b) This is an athlete.
- c) This is a car.

3.

- a) This is a clock.
- b) This is a man.
- c) This is a book.

4.

- a) This is a clock.
- b) This is a graph.
- c) This is a book.

 Have you ticked
 this activity on your
 Learning Record?

Put these words in the correct order to form sentences.

plane car faster than a travels a

provides graph a information

fifty the ran athlete metres

Don't forget!

You must have a capital letter and full stop in each sentence.

NAME: _____ DATE: _____

SCIENCE: Speed, velocity and acceleration

Language Level: A1 / A2
Type of activity: Pairs or individual
Suggested time: 20 minutes

Odd One Out

Circle the word which does not fit with the other words in each line.

Example: chair desk book train

1. window speed time distance
2. metres car velocity chair
3. object graph travels cloud
4. bike waves sound seconds

Find these words in your textbook. Then put them in short sentences in your own words. Use a dictionary if necessary.

- metres _____
- distance _____
- travels _____
- time _____
- graph _____
- waves _____

Check that these keywords are in your personal dictionary.

NAME: _____ DATE: _____

SCIENCE: Speed, velocity and acceleration

Language Level: A2 / B1
Type of activity: Individual
Suggested time: 40 minutes

Science keywords

Fill in the missing letters of the keywords listed below.

On the line next to the keywords, write down whether this word is a noun, an adjective or a verb.

1. d_st_n_e _____

2. g_a_h _____

3. a_hl_t_ _____

4. v_l_ci_y _____

Write as many words as possible relating to travelling and speed.
You have 3 minutes.

NAME: _____ DATE: _____

SCIENCE: Speed, velocity and acceleration

Language Level: A1 / A2
Type of activity: Pairs or individual
Suggested time: 20 minutes

Unscramble the letters

1. The rate of change of distance with time PSEDE

Answer _____

2. Speed in a given direction VLEOTCIY

Answer _____

3. Velocity is measured in MTREES

Answer _____

4. A sports person is also called an AHTELET

Answer _____

Look at each word as you write the answer.

Is your spelling correct?

Can you pronounce the word?

Do you know what the word means?

Have you got this word in your personal dictionary?

Solve the secret code

English=	A	C	D	E	F	I	N	M	O	S	T	U
Code=	B	X	Y	F	G	Q	R	O	L	E	A	W

example: EAWYFRA = STUDENT

YQEABRXF _____

NAME: _____ DATE: _____

SCIENCE: Speed, velocity and acceleration

Language Level: A2 / B1
Type of activity: Pairs or individual
Suggested time: 40 minutes

Completing text

Fill in the blanks in these sentences. Use words from the Word Box below.

SPEED

_____ is the rate of change of distance with time.

The world's fastest athletes can run 100 m in less than 10 seconds. The average speed of the athlete is found by dividing the _____ travelled by the time taken.

VELOCITY

_____ is speed in a given direction. Like speed, velocity is measured in _____ per second (m/s or m s⁻¹). It tells you the speed that something is travelling, but it also tells you the _____ in which it is travelling. For example, an athlete is running with a velocity of 17 m s⁻¹ due south.

Word Box

direction	velocity
metres	distance
	speed

Fill in the missing words to show different descriptions of speed:

slow		
	faster	
		quickest

Write a sentence to show how you use each of these words:

slow _____

faster _____

quickest _____

Language Level: A2 / B1
 Type of activity: Individual
 Suggested time: 30

Multiple choice

(Read the text below and choose the best answers)

Like speed, velocity is measured in metres per second (m/s or m s⁻¹). It tells you the speed that something is travelling, but it also tells you the direction in which it is travelling. For example, an athlete is running with a velocity of 17 m s⁻¹ due south. When an object is stationary distance travelled does not change with time. When an object is moving at constant velocity the speed remains the same.

1. What is velocity measured in?

a) metres	b) graphs
c) not sure	d) volume

2. What does velocity tell you?

a) news	b) nothing
c) weather	d) the speed and direction something is travelling

3. What happens to the distance of a stationary object?

a). changes	b) does not change with time
c). speeds up	d) moves

4. Does the speed remain the same when an object is moving?

a) Yes	b) No
--------	-------

Find these words in your textbook.

Write your own explanations for the words. Then write a note or example to help you remember the word. Use your dictionary if necessary.

Word	Page in textbook	Explanation	Note or example
stationary			
constant			
direction			
due (south)			

NAME: _____ DATE: _____

SCIENCE: Speed, velocity and acceleration

Language Level: B1
Type of activity: Pairs / small groups
Suggested time: 40 minutes

Writing

Planning text

Use this chart to plan a short text on the topic, 'Measuring speed'.

Introduction

First paragraph

Second paragraph

Concluding points

Important words for this topic.

What is the difference between acceleration and deceleration?
Look carefully at the spelling.

Have you ticked
this activity on your
Learning Record?

Language Level: All
 Type of activity: Individual
 Suggested time: 30 minutes

Grammar Points

In this Unit, we came across the following adjectives:

- **fastest**
- **slow**
- **stationary**

Write the meanings of these words in English:

fastest	
slow	
stationary	

Adjective Hunt

Circle the 10 adjectives in these columns. Score 4 points for each correct answer. Who will score the highest? Perhaps you will. Good luck!

- | | |

Score: _____ points

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Language Level: All
Type of activity: Individual
Suggested time: 30 minutes

Grammar points

Adverbs describe how things are done. In this unit we have been studying speed and velocity.

Look at these sentences. The adverbs are underlined.

Write each adverb in your own language on the line beside the sentence.

	In my language
Light travels <u>quickly</u> .	
Traffic moves <u>slowly</u> in the city.	
You must read your textbook <u>carefully</u> .	
It is important to write <u>clearly</u> .	
To get hot water you must boil it <u>rapidly</u> .	

Now write your own sentences using these words:

quickly _____

slowly _____

carefully _____

clearly _____

rapidly _____

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Alphaboxes

Using your textbook, find **one** word beginning with each of the letters of the alphabet. Write the word in the relevant box. You could also write the word in your own language.

a	b	c
d	e	f
g	h	i
j	k	l
m	n	o
p	q	r
s	t	u
v	w	xyz

Do you understand all these words?

Get your teacher to check this, then file it in your folder so you can use it in the future.

NAME: _____ DATE: _____

Answer key

Circle the words in the box that are about travelling or can be used to travel

		plane		
	rocket			
fast		bus		slow
		train		
		car		
	bicycle			boat
		helicopter		

Scrambled sentences =

A plane travels faster than a car.

A graph provides information.

The athlete ran fifty metres.

Odd One Out =

window, chair, cloud, bike

Letter Scramble =

speed
velocity
metres
athlete

Secret Code =

distance

NAME: _____ DATE: _____
SCIENCE: Speed, velocity and acceleration

Completing Text =

SPEED

Speed is the rate of change of distance with time.

The world's fastest athletes can run 100 m in less than 10 seconds. The average speed of the athlete is found by dividing the distance travelled by the time taken.

VELOCITY

Velocity is speed in a given direction. Like speed, velocity is measured in metres per second (m/s or m s⁻¹). It tells you the speed that something is travelling, but it also tells you the direction in which it is travelling. For example, an athlete is running with a velocity of 17 m s⁻¹ due south.
