

3.8 Grammar points

Levels: All

While aspects of grammar and structure are presented and highlighted throughout these materials, there are two dedicated grammar-based exercises in each unit.

The '**Grammar points**' draw on aspects of grammar or language use that have occurred, in particular, in the topic being studied. Therefore they are taken directly from the context of the subject and topic.

Activities that focus on grammar and language use include, among others, the use of prepositions; adjectives; adverbs; regular and irregular tenses; spelling changes in plural nouns; and key language in use.
